**ELEVATING
EXCELLENCE**

INNOVATING TOMORROW'S TGH

PLASTIC & BURN SURGERY

Benefitting the TGH Plastic and Burn Surgery Institute

The TGH Plastic & Burn Surgery Institute provides exceptional care to patients across a wide variety of clinical focus areas, including:

- limb preservation
- craniofacial trauma
- breast reconstruction
- lymphedema
- hand & peripheral nerve reconstruction
- aesthetic medicine
- burn & wound, general reconstruction
- cutaneous oncology
- body contouring

Led by Dr. Nicholas Panetta, the TGH Plastic & Burn Surgery Institute has one of the busiest Symani robot programs in the country, providing patients with access to the latest technology in microsurgical reconstruction.

Funds from the 2026 TGH Foundation Golf Tournament will provide the means for the TGH Plastic & Burn Surgery Institute to purchase a **SonoSite LX system with the 46 MHz transducer**, offering unparalleled ultrasound imaging tailored specifically to the complex needs of plastic surgery and anesthesia teams.

The ultra-high frequency transducer allows for precise visualization of superficial structures—such as small vessels, nerves, and soft tissues—facilitating more accurate surgical planning, intraoperative guidance, and postoperative monitoring. This reduces risks, improves aesthetic outcomes, and enhances patient safety. In anesthesia, the advanced imaging clarity aids in the accurate identification of nerves and vascular landmarks, enabling safer and more effective regional anesthesia and nerve blocks. This results in improved patient comfort, reduced complications, and faster recovery times.

This technology supports world-class care through enhanced precision, safety, and efficiency, reinforcing Tampa General's standing as a cutting-edge healthcare leader renowned for comprehensive and innovative patient management.
