A Message from the director

Thank you for considering the Tampa General Hospital Abdominal Transplant Surgery Fellowship Program. We are honored by your interest and thrilled to share more about our exceptional program.

At Tampa General, we are proud to be recognized by the Organ Procurement and Transplant Network (OPTN) as the No. 1 institute in the nation for transplant by volume. With such high volumes, our outcomes are unparalleled, which means more lives saved, better results and consistently high-quality care. Our success is a testament to the extraordinary dedication and expertise of our world-class physicians, who are at the forefront of the field.

Our fellowship provides an unparalleled opportunity to train in abdominal transplant surgery under the guidance of some of the most skilled and innovative surgeons in the country. From liver and kidney transplantation to cutting-edge procedures like laparoscopic and robotic donor nephrectomies, our fellows gain hands-on experience in a wide array of complex cases. This rigorous training ensures that our fellows are not only confident but exceptionally well-prepared for their careers.

We welcome you to reach out to our physicians, who are always eager to provide insight and guidance, and answer any questions you may have. Our faculty is not only highly accomplished but also approachable, fostering a supportive environment where collaboration and growth thrive.

Once again, thank you for your interest in our program. We look forward to the opportunity to help shape your future in abdominal transplant surgery.

Warm regards,

Kiran Dhanireddy, MD
