In 2016, there were patients with diagnoses not listed above (including burn, cardiac, amputation, transplant, etc.) that were admitted to the adult inpatient rehabilitation program. A total of 1,056 patients were admitted to Tampa General’s Inpatient Rehabilitation Program from January to December 2016. Patients were seen for a combination of physical therapy, occupational therapy, and speech therapy for a minimum of 3 hours a day, 5 days a week; or a minimum of 15 hours over the course of 7 days. Nursing, psychology and recreational therapy services were also provided.

**Average age of patients:** 61 years

**Gender:**
- 54% male
- 46% female

**Patient improvement in predicted ability to function independently:**
30.8 points (average)

**Patient Satisfaction Survey results:**
(Source: Press-Ganey Survey Results January - December 2016)
A mean of 91 of our patients surveyed, stated they would recommend Tampa General Rehabilitation Center.
Adult Inpatient Orthopedic Rehabilitation Program
January 1, 2016 – December 31, 2016 Outcomes
